## ULTIMATE SANDING BLOCK COLLECTION

NEW FROM MOTOR GUARD

### EIGHT BLOCK ASSORTMENT - MODEL AP-3

**Motor Guard Corporation** is pleased to introduce a collection of the ultimate sanding blocks in an attention grabbing pop-up counter display - The **AP-3 Sanding Block Assortment**.

With a quality block for every application, from fast cutting to color sanding, the AP-3 assortment is the one-stop finishing solution.

The **Soft Block® (SB-1)** features two different densities for the ultimate sanding of curved or irregular surfaces while the **Block Buster® (HT-1)**, with its unique hole side, provides for aggressive hard block sanding.

The **Memory Block® (MB-1)** offers another double-sided block with a dense “memory” foam that conforms to irregular surfaces with little pressure. For maximum gripping power on the toughest applications, the **Wonder Block® (WB-1)** is ideal on flat or slightly curved surfaces.

The **Rocker Block® (RK-1)** and the **Roller Block® (RL-1)** both feature a soft and pliable outer layer for superior finish and a non-slip grip of abrasive sheets plus a rigid inner layer to prevent the transfer of finger marks. The Rocker Block fits a standard 6” PSA disc for dry sanding while the Roller Block uses a folded sheet and is the ultimate wet sanding block.

The **Big-Block®** powers up hand sanding with a strong and comfortable grip. Three layers of engineered materials permit just the right degree of flexibility to ensure even pressure over the large, flat sanding surface. Available in two lengths; 6-1/2” (**BG6-1**) and 12” (**BG12-1**). These blocks are designed for use with 2-3/4” PSA rolls or standard abrasive sheets.

**Users of these unique Sanding Blocks report reduced paint prep times, reduced material consumption and increased paint department productivity.**

**AP-3 Standing Block Assortment**

# MAGNA

## ULTIMATE SANDING BLOCK COLLECTION

FROM MOTOR GUARD

### RK-1 Magna Rocker Block

For all jobs from rough sanding filler to final finish sanding. Utilizes standard 6" PSA sanding discs. Unique and innovative shape features a radius edge for contour sanding. Multi-layer design eliminates the transfer of finger marks.

### RL-1 Magna Roller Block

Specifically designed for wet sanding applications. Utilizes a 5-1/2"x9" abrasive sheet folded into thirds. The exclusive rounded sides lift the edges of the sheet away from the work, eliminating sanding defects.

Now Available with Hook & Loop Facing - RKH-1 (Hook) and RKL-1 (Loop).

### SB-1 Magna Soft Block

These are the unique double density blocks that act as two blocks in one, achieving the ultimate in block sanding or curved or irregular shaped surfaces. These blocks require no adhesives; sandpaper sticks like glue. The dense side is for more aggressive blocking, while the soft side is for color sanding.

### MB-1 Magna Memory Block

Unique sanding solutions for difficult applications. Hard side for PSA paper, extreme curving power for fender crowns and motorcycle tanks. Soft "Memory" side reduces pressure for nibs, louvers and other challenging surfaces.

### BG6-1/BG12-1 Big-Block Maximum Sanding Blocks

Power-up hand sanding with two large blocks which feature multi-layer construction and exclusive radius edges. Designed for use with 2-3/4" PSA rolls or standard sheets. Available in two lengths; 6-1/2" (BG6-1) for hand sanding over smaller areas and 12" (BG12-1) for two-handed power blocking on large panels.

### BBS-1 Scuff Pad, Soft Backer Block \*

Soft and flexible for scuffing areas not accessible to rigid blocks. Flexible, yet still evenly distributes pressure, imparting an even "tooth" over the entire panel with a single pass.

### HT-1 Magna Block Buster, The Holey Terror

Block sands areas where ordinary hard blocks are not adequate. "Hole" side cuts 30% faster, back side for less aggressive applications.

### WB-1 Wonder Block Supreme Sanding Block

Rugged, ergonomically designed for maximum gripping power over flat to slightly curved surfaces. Designed for all types of paper but ideal for PSA, with the sanding surface conforming to the panel shape.

\*Not included in AP-3

From Pulling to Painting, Motor Guard Corporation has a product for all of your autobody repair and refinishing needs.
