

MOTOR GUARD

MINI DESICCANT DRYER

NEW FROM MOTOR GUARD

ELIMINATE PAINTING FAILURES DUE TO WATER VAPOR, OIL AEROSOLS AND DIRT

Motor Guard is proud to introduce the latest in its growing line of air management products - the DD-1008 Mini Desiccant Dryer. This unique product is the only in-line disposable filter that features a color change indicator, signaling time to change the filter.

Attaching directly to the spray gun, the Motor Guard Mini Desiccant Dryer removes all traces of water vapor, aerosols and dirt, providing crucial protection for final blow off of body panels and for all stages of painting including the critical application of clear-coats.

MADE IN THE U.S.A. !

EXCLUSIVE FEATURES

The key to the performance of the Motor Guard Mini Desiccant Dryer lies in its unique, patented design. A 5 micron, porous bronze element removes fine dirt particles, an oil-absorbent media removes the smallest traces of oil vapor and a charge of desiccant beads traps airborne moisture delivering air to the spray gun at an incredible -40° dew point.

The filter features a clear polycarbonate housing and view ports in the nylon guard allow for easy viewing of the moisture indicating desiccant beads. When the bead color changes completely from dark blue (-40° dew point) to pink (0° dew point), the filter should be replaced.

The Motor Guard Mini Desiccant Dryer provides a last line of defense against airborne contaminants that are commonly picked up downstream of wall-mounted filtration units and in the air hose leading to the spray gun.

Order the Motor Guard Mini Desiccant Dryer in two convenient packages:

DD-1008-2

Blister Card of 2 Filters

DD-1008-CJ

Cookie Jar of 25 Filters
