

STRIPE E-RACER® HARDWARE KIT

Model E-5000H

! **WARNING:** Read and Follow All Original Instructions for Tool
Contact number below for replacement instructions

ASSEMBLY INSTRUCTIONS

Assemble components as shown at right. fender washers must be in place on either side of wheel as shown. Lock washer must be in position shown to prevent wheel separation and possible injury.

Insert cap screw through hole in wheel. Use a combination of **pressure** and **clockwise rotation** to install oversized screw. A nut driver may be used to ease installation. Tighten cap screw firmly while holding arbor or air tool spindle with a wrench.

Install assembled wheel in a tool that is set not to exceed **4000 RPM**.
Disconnect power/air supply from tool while installing wheel.
